SPECIALTY LANDSCAPE STONE

Decorative rock, river rock, boulders & crushed stone to elevate your property

SPECIALTY LANDSCAPE STONE

Decorative rock, river rock, boulders, and crushed stone to elevate your property across Greater San Antonio.

ODG's specialty stone collection goes beyond standard gravel for projects where the material is part of the design.

Black Star Gravel

A dark, basaltic crushed stone quarried in Central Texas. Appears charcoal gray when dry and turns a striking deep black when wet. Angular shape locks together well.

Modern & contemporary pathways

Xeriscape driveways

Landscape bed contrast ground cover

Arizona River Rock & Imported Specialty Stone

Premium imported aggregates — including Arizona River Rock in vibrant rust, red, and brown tones — that bring colors and textures unavailable from local quarries.

High-end residential landscape

Commercial property showcase beds

Custom water feature surrounds

Granite Landscape Stone

Crushed granite in pink, red, and gray hues — a durable, colorful alternative to standard gravel. Adds warmth and naturalistic character to landscape beds and decorative features.

Decorative garden borders

Xeriscape planting beds

Pathway top-dressing

River Rock (Natural)

Naturally water-smoothed stones in white, gray, tan, and brown. A classic landscape material that works in both contemporary and traditional settings.

Dry creek beds & drainage

Pond & water feature edges

Low-maintenance ground cover

Decomposed Granite (Landscape Grade) 0"-1"

Fine-grade granite that compacts to a firm, permeable surface with a natural appearance. A staple for San Antonio xeriscape design.

Xeriscape pathways

Patio surfaces

Base under artificial turf

Landscape Boulders

Large natural stones used as focal points, natural seating, or structural landscape accents. Boulders add permanence and scale that smaller stone cannot achieve.

Landscape focal points

Natural retaining elements

Garden seating

I APPLICATIONS & PROJECT GUIDE

How Contractors & Homeowners Use Specialty Products

Commercial Entry Drive

Black Star Gravel flanking an entry drive delivers a high-contrast, modern look that reads as premium from the street and requires zero maintenance.

Color Contrast Beds

Use Black Star against light concrete or pale limestone walls, and Arizona River Rock (rust/red) against dark planting. High contrast reads dramatically from curb.

Full Xeriscape Design

Combine Decomposed Granite for walking areas, Black Star for accent beds, and Boulders for structure — a complete xeriscape palette that uses no turf and very little water.

Boulder Placement

Bury one-third of a boulder below grade so it looks naturally placed rather than set on top. ODG can help confirm sizing for delivery and placement.

Pro Tips Before You Order

Black Star looks different wet vs. dry

Preview your project on a rainy day — Black Star turns from charcoal to near-black when wet. That can be a feature or a surprise depending on your expectation.

Imported stone has longer lead times

Arizona River Rock and other specialty imports may require advance notice. Call ahead to confirm availability before finalizing your project schedule.
